are surrounded by land

Fresh water

water that is not salty

**Advancing: Bodies of water –
what do they look like
and where can they be found?**

Oceans

large bodies of water
that separate continents

Seas

smaller than oceans,
usually found where the
land and ocean meet

Lakes

bodies of water that are
land-locked

Hypersaline Lakes

Lakes with a high
concentration of salt.
Usually higher than the
amount of salt found in the

Fresh water

water that is not salty,
usually found in bodies of
water such as glaciers,
lakes, reservoirs and ponds
